

Project: Reconstruction and Upgrade of the 2300 West Roadway

Recipient: City of Lehi

Location: Lehi, Utah

Purpose: This transportation project will provide for the improvement of 2300 West in Lehi, a regionally significant roadway arterial which connects Lehi and surrounding cities to I-15. The enormous growth in northern Utah County has put a great deal of strain on the road infrastructure. Engineering studies completed point to the fact that in order to enhance east-west transportation mobility throughout Northern Utah County, a number of projects must be constructed to carry traffic demands.

Construction of this project will serve as a critical transportation corridor to help mitigate congestion and traffic challenges that will result in the reconstruction of Interstate 15 through Utah County. This road will serve as an alternate route to I-15 in accessing communities in the western part of Utah County.

Amount: \$2,380,000
